

> The DataStorm G74

The DataStorm G74 was designed for the HughesNet™ platform and is one of MotoSAT's newest Consumer Grade mobile satellite internet systems. The G74 was designed to provide reliability and cutting edge technology for an instant broadband solution in the harshest of environments. It can be repositioned to take advantage of the HughesNet satellites in a matter of minutes. Like all G series mounts, the G74 utilizes a groundbreaking geared motion design with powerful motors and revolutionary chain-driven gear reduction that provide industry leading acquisition times. The G74 mount incorporates a digital sensor system that allows for ultra-high resolution when acquiring and peaking of the satellite. The G74 mount uses the DataStorm DVB Controller allowing seamless upgrades and flexibility between all DataStorm series models. The DataStorm G74 system is a compact yet powerful On-The-Go Consumer/Enterprise broadband solution.

System comes with a MotoSat controller. Modems and service packages vary. Please ask us for assistance in choosing the right package for you!
